DETAILED ACTION

Reason for allowance

1. After consideration of the applicant's remark filed on January 02, 2008 in response to the Office Action mailed on October 01, 2007, and with additional examiner's proposed amendments, claim 1-4, 6-12, 14-20 and 22-23 have been found to be in condition for allowance over prior arts of record.

EXAMINER'S AMENDMENT

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

3. Authorization for this examiner's amendment was given in a telephone interview with Joseph Lutz, Reg. No.: 43, 765 on March 19, 2008.

The application has been amended as follows:

In claim 1: line 7, replace "wherein a connection" with -- wherein each of the first CA logic block and the second CA logic block further comprises a descrambler to descramble the incoming data; and wherein, when a connection--.

In claim 1: lines 7-8, replace "disabled if descrambling" with --disabled, descrambling--.

Claim 5 is cancelled.

In claim 11: line 8, replace “wherein only” with --wherein each of the plurality of conditional access logic blocks further comprises a descrambler to descramble the incoming data; and--.

Claim 13 is cancelled.

In claim 20: line 8, replace “inoperative.” with --inoperative; and wherein each of the plurality of conditional access logic blocks further comprises a descrambler to descramble the incoming data; and the first conditional access logic block of the plurality of conditional access logic blocks is enabled if the incoming scrambled content is scrambled according to the first CA function.--.

4. The following is an examiner’s statement of reasons for allowance:

Claim 1 includes the following features of a digital device which are not taught or further suggested and would not have been obvious over prior arts of record and these features are: each of the **first CA logic block** and the **second CA logic block comprises a descrambler** to descramble the incoming data; and, **when a connection between the core logic and the first CA logic block is disabled, descrambling of the incoming scrambled content is to be conducted according to the second CA function.**

Claim 11 includes the following features of a digital device which are not taught or further suggested and would not have been obvious over prior arts of record and these features

are: each of **the plurality of conditional access** logic blocks further **comprises a descrambler** to descramble the incoming data; **and the first conditional access** logic block of the plurality of conditional access logic blocks **is enabled if the incoming scrambled content is scrambled according to the first CA function.**

Claim 20 includes the following features of a digital device which are not taught or further suggested and would not have been obvious over prior arts of record and these features are: each of **the plurality of conditional access** logic blocks further **comprises a descrambler** to descramble the incoming data; and the **first conditional access** logic block of the plurality of conditional access logic blocks **is enabled if the incoming scrambled content is scrambled according to the first CA function**, and the programmable gates of the programmable logic device are **one-time programmable and battery-backed so that disruption of power will cause the programmable logic device to become inoperative.**
